FINDINGS — SPHENOID BONE

Flexion • Extension • Right torsion • Left torsion • Right side-bending rotation • Left side-bending rotation • Superior vertical strain • Inferior vertical strain • Right lateral strain • Left lateral strain • SBS compression • Pre-sphenoid / post-sphenoid disengagement • Lesser wings dysfunction • Greater wings dysfunction • Sphenopetrosal suture • Sphenosquamous suture • Sphenoparietal suture • Frontosphenoidal suture • Sphenozygomatic suture • Sphenomaxillary suture • Sphenovomerine suture • Sphenopalatine suture • New irritability / aggressiveness • Apathy / withdrawal • Head touch hypersensitivity • Unexplained performance drop • (!) Reported cycle irregularity • Post head trauma • Reported trauma (blow, fall) Stress / change context • Postural context • Post recent dental care • Post veterinary intervention • No identified cause
